

## Participant Pathway

People aged from 55 to 74 and 364 days who have ever smoked invited to Lung Cancer Screening

### Key:

- A** = suspected lung cancer on any LDCT or  $\geq 300\text{mm}^3$  or  $\geq 8\text{mm}$  max. diameter and Brock risk  $\geq 10\%$ .
- B** = indeterminate result: **B**<sup>1</sup>  $\geq 80$  to  $< 300\text{mm}^3$  or  $\geq 6\text{mm}$  and  $< 8\text{mm}$ .  
**B**<sup>1</sup>  $\geq 300\text{mm}^3$  or  $\geq 8\text{mm}$  max. diameter and Brock risk  $< 10\%$ .  
**B**<sup>2</sup> 5 to 6mm diameter.
- C** = no significant finding or nodule  $< 80\text{mm}^3$  or  $< 5\text{mm}$  max. diameter.

LDCT = low radiation dose CT.

New nodules on interval LDCT: see protocol section 5.1.2.
