Safety Netting Template Pilot V1 6/18	Pilot tools for validation. Validated items will be...	Template		21-May-2018	Active

  

**Safety Netting Template Pilot V1 6/18**

General | Triggers | History

Type: Template

Description: Pilot tools for validation. Validated items will be launched/released in due course. Template enables electronic tracking of patients from high to low levels of concern. To be used with the safety net searches.

Version: 2

Modified: 21-May-2018

Author: EMIS

Organisation: National

Status: Active

If you prefer you can search for safety netting and the template will be brought up too, rather than dropping into folders.

## Location for the safety netting search:

Under reporting - emis library - emis protocol - third sector partnerships - Macmillan cancer support - cancer safety netting.

Name	Population Count	%	Last Run	Search Type	Scheduled
Cancer safety net diary searches	4	1%	11-Jun-2018	Patient	
Cancer safety net diary searches Report	4		11-Jun-2018	Patient	

  

**Cancer safety net diary searches**

Details | Definition | Age / Sex | Trend | Population Included | Population Excluded

Description: Pilot tools for validation. Validated items will be launched/released in due course. Safety net searches. This search is used as part of the safety netting toolkit. They will pick up any expired diary entry codes that are within the safety net template. The diary entries are removed from the search once the diary entry is complete.

Parent Population: Currently registered regular patients

Author: EMIS, Emis () | Date Modified: 07-Jun-2018

Last Run: 11-Jun-2018 12:35 | Relative Date: 11-Jun-2018 12:35

Population Count	Parent	%	Excluded
4	3884	1%	3880

If you prefer you can search for the search and it will be brought up too, rather than dropping into folders.

The files are all inactive and you WILL NEED TO ACTIVATE in order to use them.

This goes for the templates, protocol alerts and the search.

**IF YOU ARE USING A PILOT/DRAFT VERSION OF THE TOOLKIT:**

If you have a draft/pilot version of the toolkit in your practice you will need to deactivate and archive the old version before you activate the new ones so there isn't confusion or clashing with the various files. This includes individually deactivating the template, the protocol alerts and the search.
