

How to order the NSS/RDC pathway test bundle on ICE

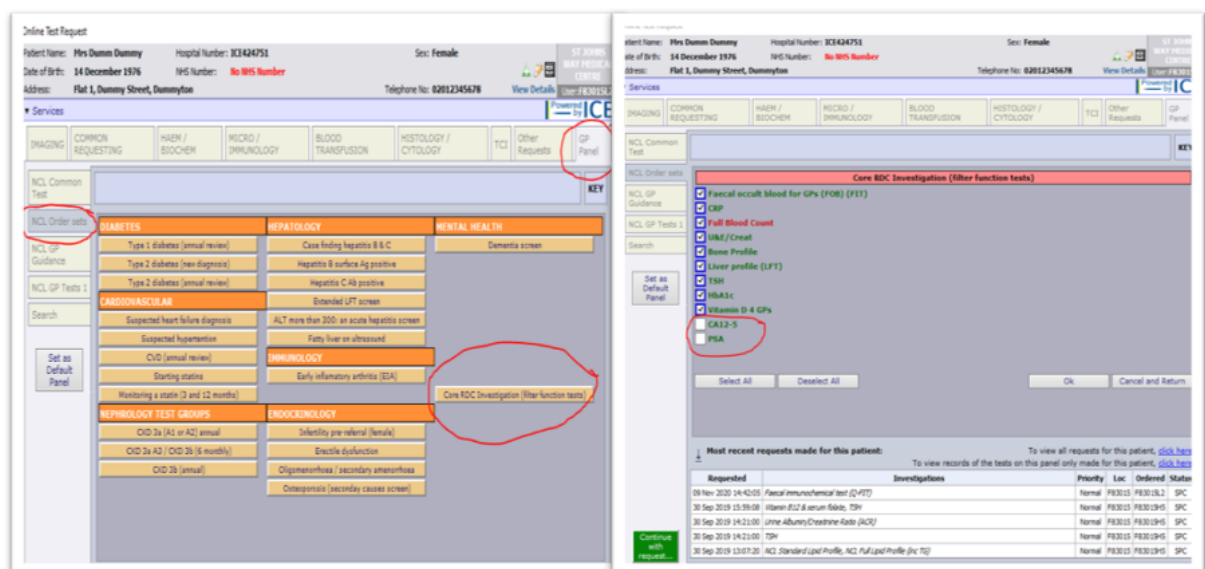

This is a guide for primary care for ordering the bundle of tests required when referring a patient on the non-specific symptoms (RDC) pathway on ICE.

1. Navigate to GP Panel (top right button)
2. Click on “NCL Order Sets” (button on left hand side of screen)
3. Click on “core RDC Investigations” (yellow tab)
4. All the necessary tests you need to request are already pre-ticked apart from PSA or Ca125 which you select depending on your patient’s gender

RDC Referral Process

RDCs bundle of investigations be ordered ideally before referring – special button to do this on both TQUEST and ICE to make it quicker – check PSA or CA125 as appropriate for pt

*** Remember to Safety net tests being done ***
