

Registry post-training and onboarding questionnaire

Section 1: Demographics and Onboarding to the service evaluation:

1. **Demographics data: Name, surgery, borough, surgery population, number of FTE GPs/Nurses/HCPs.**

2. Some organisations have business intelligence functions. Does your practice or PCN have a data/analytics support person i.e. A management or clinical lead who looks at the practice/PCN population data across various data sets, to inform or advise on practice/service change improvement ?
 - Yes - it's a clinical person (e.g. GP)
 - Yes - it's someone non-clinical - please state role
 - No
 - Not sure

Section 2: Having completed the training session:

3. Have your expectations for the cancer registry tool changed after receiving training?
 - yes / no - explain

4. What is your motivation for taking part in the service evaluation? Tick relevant boxes
 - Cancer interest
 - Population health interest
 - Develop a new interest
 - Learn new skills
 - Income generation for practice
 - other

5. Has this training motivated you to explore or learn more about the HealthEintent tools already available in your practice? E.g. review other analytics dashboards or registries?
 - Yes - please tell us which ones (freetype)
 - No
 - No I already use them

6. Post training, how confident do you feel already about:

	0 (no confidence e.g. I would not know where to start)	3	4	5 (very confident)
using population health management tools in general?				

the overall purpose of tools like the registry?				
---	--	--	--	--

7. Post training, to what extent are you currently aware of the following?

	aware	i have some idea but not sure	not aware but but know how to find out	unaware
How to access the population health management tools through Cerner's HealthEintent				
What data/quality indicators are part of the cancer registry				
That the cancer care registry can support your achieving practice cancer QOF targets				
How to use the data in the registry to review your practices' cancer quality performance				
Who to contact to set up access and send digital platform queries to				

8. What obstacles do you anticipate facing when implementing the cancer registry tool in your practice? (optional)

Free comments

9. What did you find most useful about the training session? (optional)

Free comments

10. Do you have any recommendations for change/improvement of the implementation training for the HealthEintent cancer care registry for the future? (optional)
