

Healthy Lungs

Healthier You

Lung cancer symptoms often appear late

A cough lasting 3 weeks or more

Breathlessness

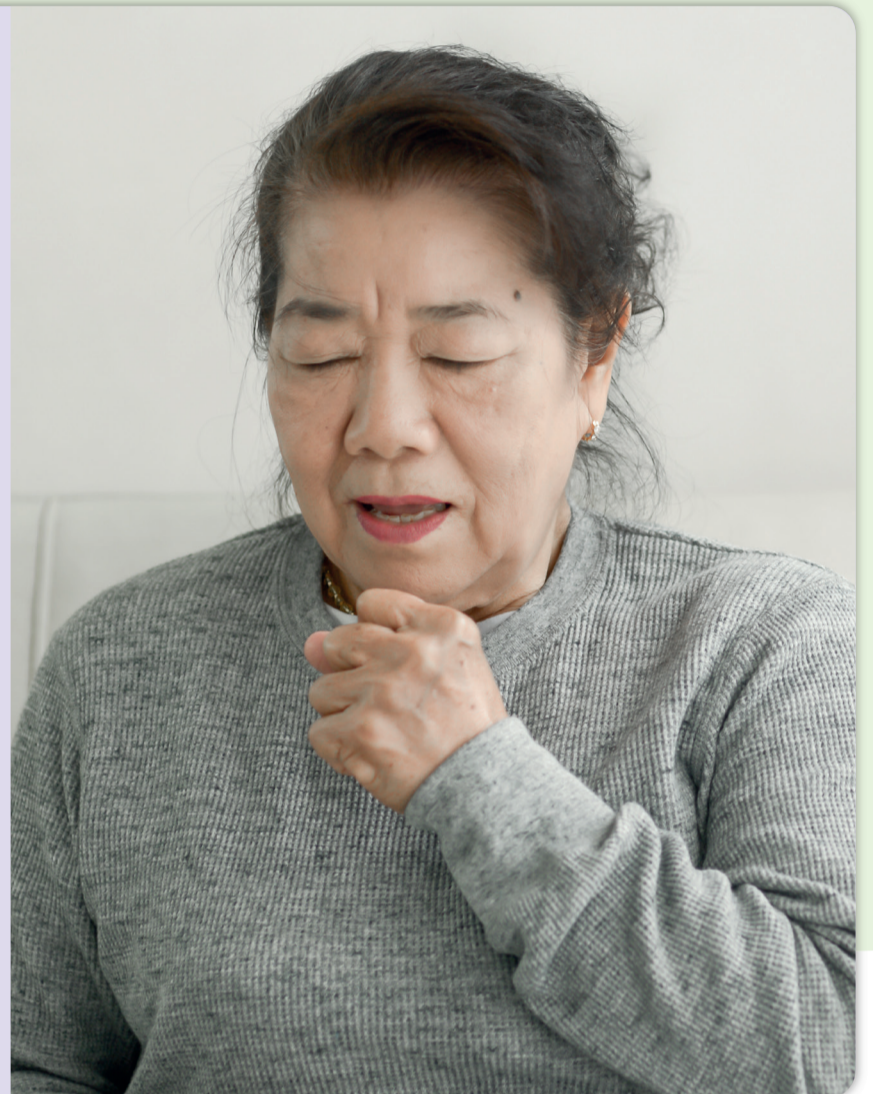

Chest pain

Coughing up blood

Unexplained tiredness or weight loss

If you notice any of these symptoms, don't wait.
Talk to your GP.

The NHS also offers free lung cancer screening for people **aged 55-74 who smoke or used to smoke and feel well.**

Look out for your letter.

A simple check today could protect your lungs for the future.
